

Still More Stories From VA Psychology

Edited by Rodney R. Baker and Kathleen M. McNamara

Still More Stories From VA Psychology follows the format of the first three books in the series (see below) in describing the leadership careers of twelve former and current psychology leaders in the Veterans Administration, now the Department of Veterans Affairs (VA). The careers of the chapter authors in this volume collectively span 1976 to the present, and all four volumes collectively cover all 74 years of VA psychology history from 1946 to the present.

The authors describe their formative VA training, trace their career development, and describe their clinical, training, research, administrative, and advocacy experiences. Their leadership stories in VA medical centers and in VA Central Office illustrate satisfying careers serving veterans and working with colleagues they admired and respected. The stories help to expand the understanding of the formal history of VA psychologists in helping veterans over the years.
